# 03

## MORE USE CASES

### <HEADER>

### <NAV>

# 04

## <HEADER>

The header element represents a group of introductory or navigational aids.

## <NAV>

Represents a section of a page that links to other pages or to parts within the page.

## <MAIN>

Main content of the page.  
Has to be unique.

# 05

## <ASIDE>

Represents a section of a page that consists of content that is indirectly related to the content around the aside.

## <FOOTER>

Represents a footer for its nearest ancestor sectioning. For example, the one in the screenshot represents a footer for the <body>, as it's the nearest ancestor sectioning.

# 06

## ANCHOR VS BUTTON

<ANCHOR>

Contact us

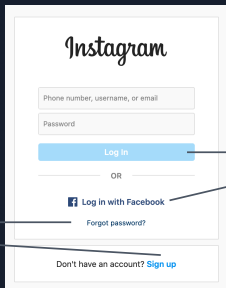

Use it to redirect the user to a destination page or a section within a page.

<BUTTON>

Sign in!

Best suited for actions that don't require redirection. Commonly used with onClick functions.

<ANCHOR>

Instagram

Phone number, username, or email

## 08

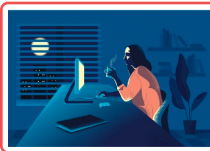

## FIGURE VS IMAGE

```
<h3>You're Still Doing Remote Work All Wrong</h3>
<p>
  One year later, an army of remote workers are still making rookie
  mistakes that lead to burnout
</p>
<img src='late-night-person-working.jpeg' alt='...' />
```

 Will Leitch in Index**You're Still Doing Remote Work All Wrong**

One year later, an army of remote workers are still making rookie mistakes that lead to burnout

Mar 17 · 6 min read ★

The image is literally a part of the post content, so it's not a self-contained unit, and thus a figure tag would be inappropriate.
